The Greystar RealPage stack includes a **LeaseLabs Essentials** website theme Each theme is optimized for search and designed to be fully responsive to provide an optimal viewing experience regardless of the device used - desktop, smart phone, or tablet.

Greystar has partnered with RealPage to create a series of exclusive website themes that are only available to our communities. All **Greystar Proprietary** themes support custom pages at no additional cost.

All themes support and are setup on the Greystar custom footer. This footer allows RealPage to make updates at the theme level.
All themes integrate with the RealPage Interactive Site Map as well as a virtual tours widget (Tour URL required), and can link out to the Engrain Site Map product.

Visit the Greystar Gallery for demo sites of each theme

Theme	Theme Type	Supported Customizations	Sticky navigation (Menu stays on page when scrolling down)	Header color change	Footer color change	Background Color Change	Background Patterns	Horizontal Logo	Vertical Logo	Home Page Video (YouTube or Vimeo hosted)
